EDUCATION

2010 - 2015
ITIS "E. TORRICELLI"
• Computer Science Technical Diploma (Perito Informatico)
• Grade: 87/100

SKILLS

Kotlin · Jetpack Compose
Multi-module Architecture (MVVM)
Coroutines / Flow · Hilt · Room
Retrofit / OkHttp · REST APIs
Firebase Suite · GA4
A/B Testing & Experimentation
CI/CD · Fastlane · Play Store
LLM Integration
React Native (brownfield)
Accessibility (TalkBack, WCAG)
AI-assisted Development (Claude Code)
Git

LANGUAGES

Italian: native
English: fluent

PROFILE

Senior Android Developer with 10+ years in software engineering, specialized in native Kotlin apps at scale. Sole Android developer of Jetcost (lastminute.com group): ~600K monthly active users across 15 markets, 5M+ downloads, 99.7% crash-free. I combine state-of-the-art Android architecture with product thinking, shaping technical decisions alongside product and business stakeholders.

WORK EXPERIENCE

Senior Android Developer

lastminute.com, Chiasso, Switzerland (Remote)
May 2022 - Present

Solely responsible for the native Android app of Jetcost, the flight & hotel metasearch of the lastminute.com group.

- Own the full development cycle of an app serving **~600K monthly active users**, maintaining a **99.7% crash-free user rate** and a 0.03% ANR rate.
- Drive the migration to **Jetpack Compose** (~60% of main screens, all new features Compose-first); Play Store rating up **from ~3.8 to 4.3★**.
- Ship A/B-tested experiments end-to-end: a search-funnel redesign **more than doubled core CTR (+125%)** and lifted core revenue by +81% in pilot markets.
- Run a fully automated release train with **Fastlane** (bi-weekly production releases, store assets included); ensure GDPR compliance via certified CMP + Google Consent Mode v2.
- Co-define the cross-platform strategy: **React Native (Expo) brownfield** integration of shared search widgets.

Stack: Kotlin, Java (legacy), Compose, Hilt, Room, Coroutines/Flow, Retrofit, Firebase, GA4 + in-house analytics, Braze, AppsFlyer, Lottie, Fastlane, TypeScript

Android Developer

Noovle S.p.A., Milan, Italy (Remote)
January 2021 - May 2022

Developed "Viaggiare Sicuri", the official travel-safety app of the Italian Ministry of Foreign Affairs: **500K+ downloads**.

- Built geolocation-based safety notifications, emergency **safety check**, and 220 country factsheets, integrated with Google Cloud Platform, Firebase, and App Engine.
- Delivered the strict **accessibility compliance** required by the public sector: TalkBack support, dynamic font sizing, and dark mode.

Stack: Kotlin, MVVM, Coroutines, RxJava, Room, LiveData, Koin, Retrofit, GCP

Android Developer

PIC Servizi per l'informatica, Milan, Italy
August 2015 - January 2021

Android developer on one of Italy's largest **Salesforce Field Service** projects: the workforce-management platform of Unareti (A2A group), serving 3.5M+ supply points.

- Built the **offline-first tablet app** used daily by field crews (Salesforce Mobile SDK, full offline sync), handling a wide and growing catalog of work-order types; the platform cut intervention times by up to **40%**.
- **Led a team of up to 4 people** (development + AMS), owning the client relationship end-to-end: requirements, estimates, and technical analysis.
- Integrated Salesforce with external systems via MuleSoft and TIBCO (REST/SOAP, PostgreSQL, asynchronous Apex).

Stack: Android SDK, Salesforce Mobile SDK, Apex, Process Builder/Flow, MuleSoft, TIBCO, PostgreSQL

PERSONAL PROJECT

Packly

AI travel planner, designed and shipped solo
2026, live on Google Play

30+ Gradle modules, 100% Jetpack Compose, Navigation 3, **three pluggable LLMs** (Claude, GPT, Gemini) with SSE streaming and automatic fallback, Play Billing subscriptions, and 10+ locales.
